

Introduction of CNNIC's Running Model

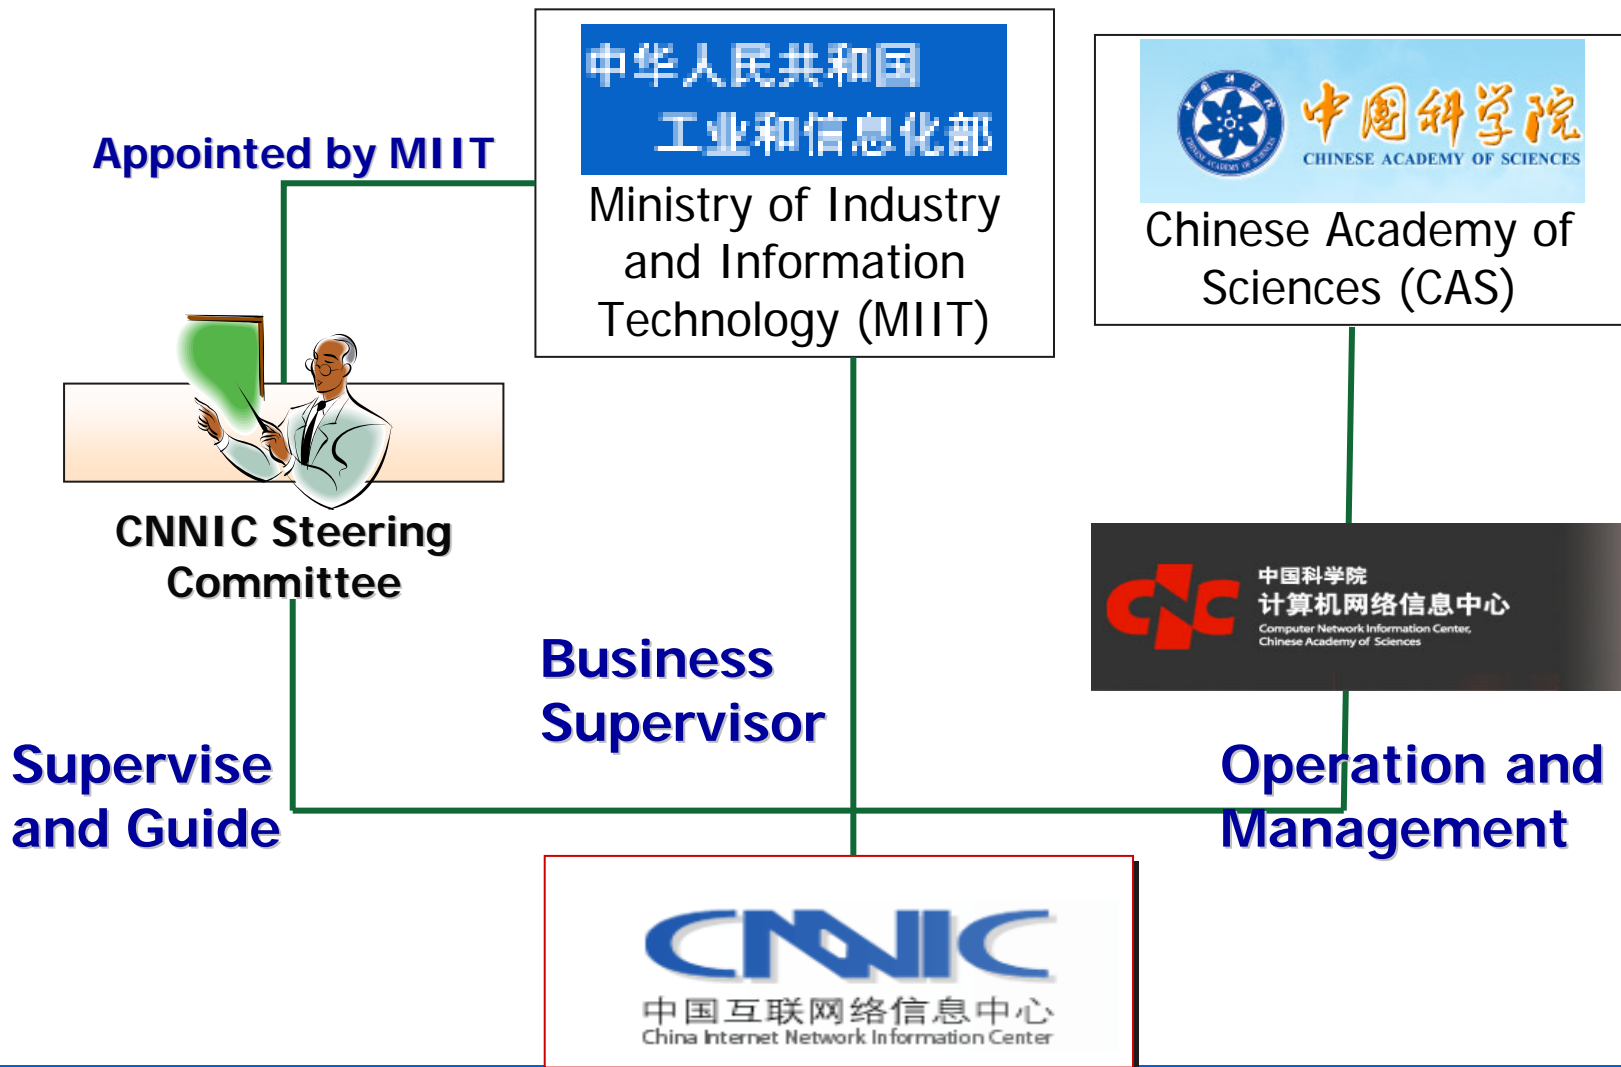

Tan Yaling
For APTLD HK meeting
Feb 18, 2011

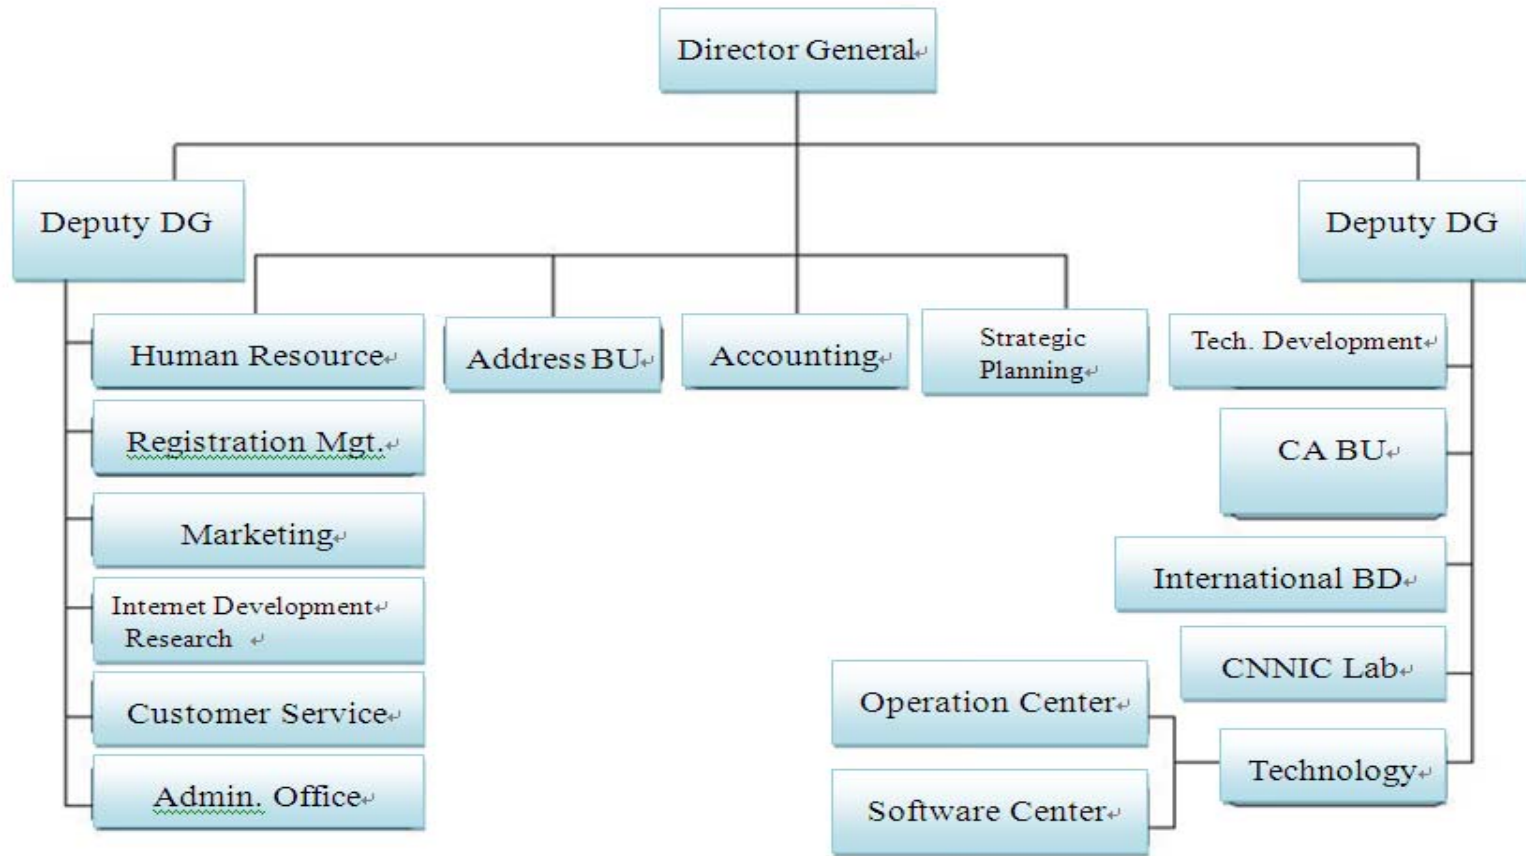

A brief history

- China realized full functional connection to the Internet in 1994
- Chinese Government authorized the setup of CNNIC on May 30, 1997
- On June 3rd, 1997, CNNIC was found, carrying out the duty of national Network Information Center.

Organization Structure

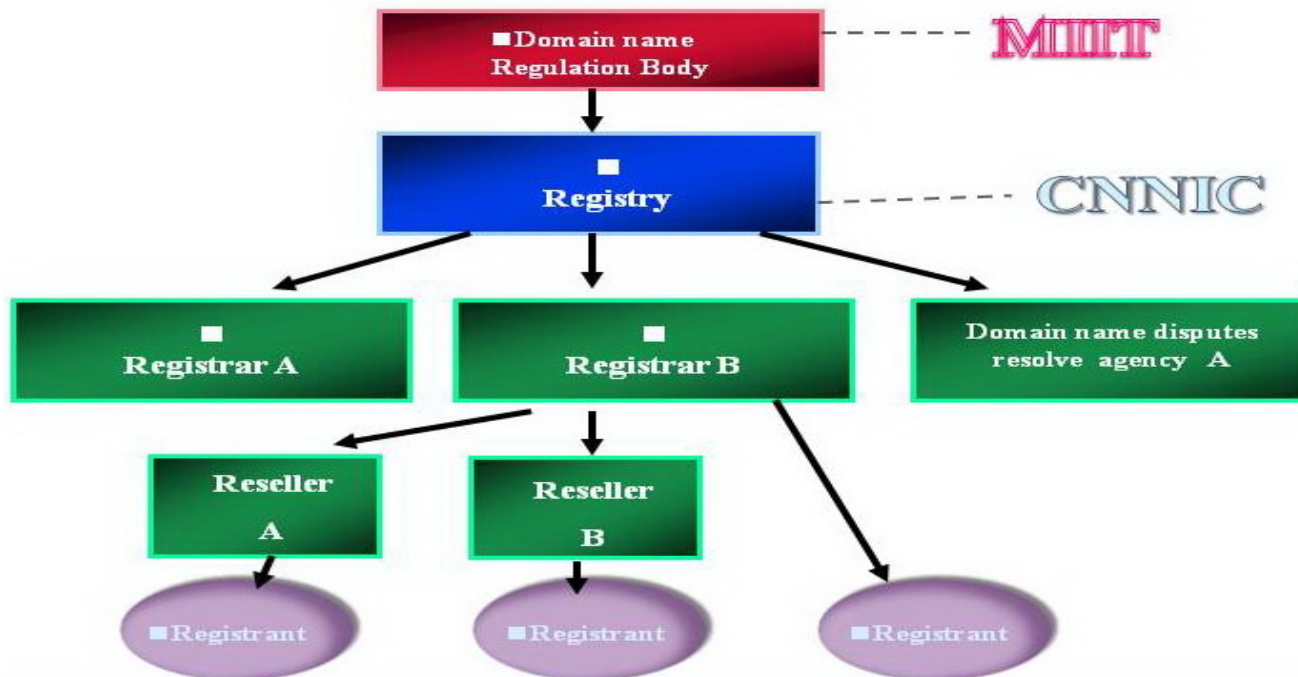

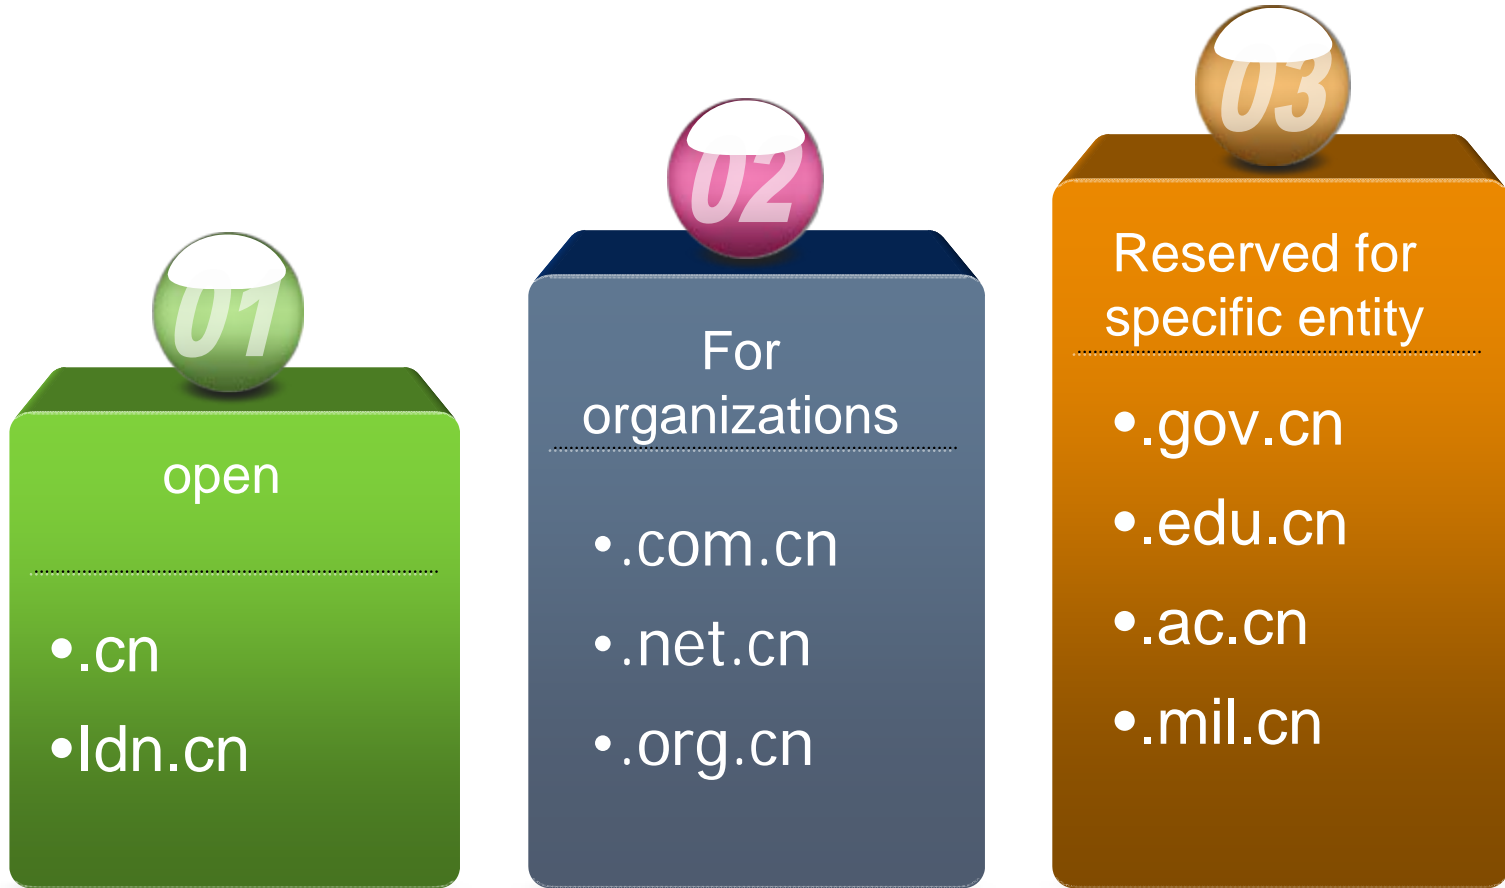

- 14 departments, 212 staffs, average age is 30.
- 56% of our staff hold master and up graduate degrees.
- 5 CAS research fellows, and 9 CAS senior engineers.

Registry-Registrar Model

- 53 domestic Accredited CN registrars, 11 oversea
- 42 domestic Accredited CDN registrars, 2 oversea
- 2 Dispute Resolution service providers: CIETAC AND HKIAC

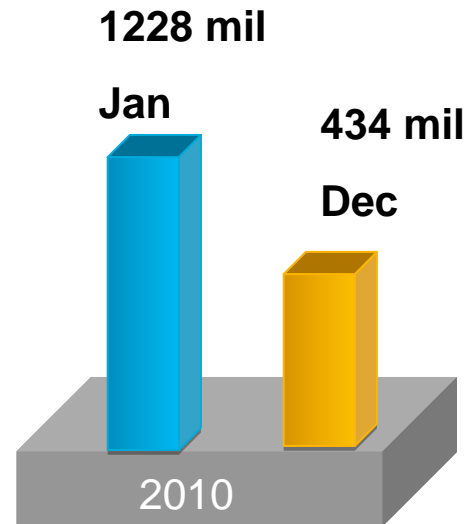

Domain name Registration System

Implemented new registration policy (since Jan., 2010) to reinforce whois accuracy

- Person or organizations, not limited in China
- audit of credentials (new procedure)
- Audit of names
- Activate names
