Present Registration Application

The screenshot shows a web browser window with the address bar displaying <https://register.net.id/>. The page header features the logo of the Department of Communication and Information Technology of the Republic of Indonesia, with the text "DEPARTEMEN KOMUNIKASI DAN INFORMATIKA REPUBLIK INDONESIA" and "DEPARTMENT OF COMMUNICATION AND INFORMATION TECHNOLOGY OF THE REPUBLIC OF INDONESIA". Below the header is a banner image showing a satellite, a person, and a mobile phone, with a map of Indonesia in the background. The main content area is titled "Sistem Pengelolaan Domain .ID KOMINFO". On the left side, there is a vertical menu with the following items: Register, Resend Activation, Whois Service, Login, Officer, FAQ, Petunjuk Penggunaan, and Lost Password. On the right side, there is a "Pemberitahuan:" (Notice) section containing a list of four items:

1. Untuk sementara, pendaftaran maupun pengelolaan domain akan lebih optimal jika menggunakan web browser Firefox [download di sini]. Untuk browser lainnya, ada kemungkinan terjadi error pada interface.
2. Untuk email aktivasi registrasi yang menggunakan email dari yahoo, mohon periksa bulk folder anda.
3. Sistem pengelolaan domain .ID ini dapat diakses melalui link berikut
4. Perubahan nomor telepon support domain .ID menjadi **021-68830615**

Mohon maaf atas ketidaknyamanan ini.

Name Server	ns3.yahoo.com

Present Challenges

- ★ Inadequate number of support staff to handle inquiries and complaints mostly in the form of emails and messages
- ★ Average registration turn around time more than 5 working days for incomplete documents (average 1 working day for “clean registrations”)
- ★ Present system has very limited statistical and performance reporting
- ★ No startup capital for “new system” (all registration and extension has been free since 2005)

Plans and Expectations

- Review of existing policies and procedures
- Multiple registrar implementation (registry-registrar-reseller model)
- Learn from others, adopt best practices
- Anticipate future trends and requirements
- Establish strong supporting organization to manage anticipated growth
- Strong promotion campaign for **.ID**

Anticipated Challenges

- Rapidly changing technology
- DNS and related traffic volumes
- Attempted hacking and DOS attacks
- Operating costs
- Promotion and education
