Registry and Registrars: Setting Wheels in Motion (at a Slow Speed)

Registry
- The register is the registrar
- Web Service / API
- no EPP/IDN
- no ipv6/DNSSEC
- NO METRICS, METHODOLOGY, AND INSTRUMENTS TO GAUGE THE REGISTRY’S PERFORMANCE!
Registry and registrar: two in one, problem solutions, legislation, action

.UZ implemented the Registry-Registrar Scheme

- Government agencies
- High price
- Protection from cybersquatting
- General registration of 306 domain names
- is not competitive
Future plans (increase in registrars, joint programs)

- Working with Registrars
- Recruitment of new Registrars in the regions of the Republic
- Introduction of new opportunities for on-line domain registration
- Introduction of automation-based services to secure seamless registration renewal and rights to domains
Why We Are Here?

- We joined APTLD to learn and catch up with best practices in particular in regard to:
  - The registry accessibility and operational stability, and business continuity criteria;
  - Measuring the quality of EPP and DNS services;
  - and, overall, to shape up UZINFOCOM and transform it into a modern, vibrant ccTLD registry for the benefit of the nation and our users!
Rakhmat! Thank you!
