ccTLD dot la Update

- Since 2008 LNIC has studied and planned to migrate ccTLD dot la to home country.
- Visit CNNIC, VNNIC and SGNIC to share experience and collect the information to move the ccTLD dot la primary server and registry data base to Lao PDR.
Working group

Group 1

- Set up a policy and regulation.

Group 2

- Make a technical solution for ccTLD dot la and registry migration.
ccTLD dot la solution
ccTLD dot la solution

- Anycast and Redundancy Planning
Registry dot la solution

- Chose the model of registry (SRS: Share Registry System model)
Registry dot la solution

- Setup the equipment
Registry dot la solution

- **Web Server**: acts as the online service portal, consists of Domain name registration, Domain name query, laws and regulations, process service assistance, technical Knowledge, News content column, sign-in function, etc.

- **Whoissystem**: Whois the domain name query sub channel provides online status query of the .La ccTLD and second-level domain name registration function.

- **Front-end and Back-end DB System**: Provide the functionality of saving the registration information of the registrants.
Registry dot la solution

• Query and stat. System: user status query about the domain name renewal, query new registered domain name based on date, auditing and trigger ccTLD configuration System update, mail notification the Registered Users.

• Information Auditing: Audit the new registered domain. After the domain is audited, the domain can take effect. Send email to users about information of domain.

• Monitor System: Real-time Monitor of the service status or abnormal events of the LANIC servers.

• CCTLD Log System: Receive raw log from .la name server and keep the .la name server log

• Backup System
Thank you
