Universal Acceptance & Email Address Internationalization

NITIN WALIA / APTLD75 & MEDNSF / 21st Feb 2019
UA in a Nutshell

Universal Acceptance (UA) ensures that all domain names and email addresses can be used by all Internet-enabled applications, devices and systems.
Five Verbs to UA Readiness

Email Address Internationalization (EAI)

EAI is the protocol that allows non-ascii characters in email address. EAI mail is fully interoperable with legacy ASCII mail system.

The email address has two parts, local part and domain part.

nitin@xgenplus.com

Email address internationalization supported servers/clients are supposed to deal with non-ascii email address perfectly i.e. gmail, outlook, xgenplus.
Is your registry UA & EAI READY?

* It is not ‘difficult’, but it is **worthy** and can be done.

* Don’t make assumptions, be prepared to validate input

* Support Unicode

* Accept IDN/EAI – Display IDN/EAI

* The problem is software - Your application needs to be adjusted.
UA & EAI Ready Email Solution

E-Mail Only - Focus Makes Profession

Fully UA Ready & comes with Security, Antispam, Data Leak Prevention, Encryption, Archiving, SMTP gateways, all “on premise”.
Those Who Dare – Achieves
